Satsuma combines Lotus Notes and SharePoint expertise for speedy and painless migration

## Why Satsuma?

If you're thinking of migrating from Lotus Notes to SharePoint, Satsuma offers a pragmatic, well-planned approach which delivers a seamless and stress-free transition.

This is because as well as having years of software migration experience, Satsuma takes the time to conduct a detailed scope of the scale and complexity of your migration challenge before it even starts.

Satsuma has three assets which make our migration services truly unique:

### 1. Intimate knowledge of the Notes environment.

This helps us understand exactly what you are using and how you are using it, minimising the chance of pitfalls.

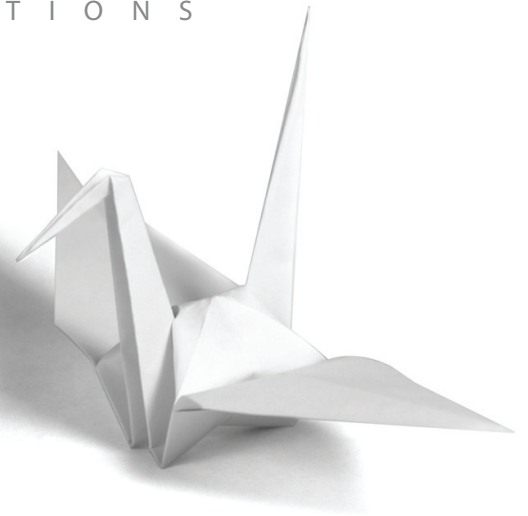

### 2. Unparalleled understanding of SharePoint.

This means we understand both where you are coming from and where you are going to, enabling us to plan the most effective transition possible.

### 3. Well-considered partnerships with the world's foremost migration tool vendors.

So you can rest assured you're getting the right migration tools for the job, at the best price.

## How we go about it:

Satsuma uses a 2-step process to streamline your migration from Lotus Notes to SharePoint, making the process as simple and cost-effective as possible.

## Step One: Satsuma Discovery PROCESS

Interview and change management techniques give us a complete understanding of how your team uses its current technologies. A thorough knowledge of the migration tools available helps us choose the right tool for the job, and apply it in a way that delivers the greatest benefits.

### RESULT

A detailed migration plan which shows you the scope and complexity of the migration challenge and enables you to arrive at cost and effort calculations before you begin any work. This includes detail about applications which require special handling, and alternative recommendations where we do not feel SharePoint is the most suitable system for your needs.

## Step Two: Satsuma Migrate PROCESS

Once we have agreed the best way to take your migration forward, we deliver a detailed project plan, which not only thinks about the best way to migrate your applications, but also considers how we can help you improve the way you work. Next we consolidate your databases to ensure a swift and cost-effective migration. For the migration itself, we use the best migration tools to ensure maximum speed with minimum disruption to your business.

### RESULT

A safe and controlled migration to your new environment, with minimal user disruption. This means less risk and an efficient changeover for you, as well as an opportunity to improve the functionality of your IT systems and boost the productivity of your business.
